Education

Graduated from Independence High School -2011
Currently enrolled in UNCC Full Stack Developer program -2019-2020

Experience

1. Strong leadership skills; I have been able to maintain 30-40 individuals beneath me to reach targeted goals.
2. Strong communication skills. Able to speak spanish and english.
3. Quick decision making. Years of management has made me think quick to solve a solution.
4. Adaptable to what is handed to me. Life is changing every moment and I feel as I am able to adapt quickly.

Projects

https://alexpr704.github.io/dynamic - This portfolio demonstrates what I have been able to do on HTML and CSS. I was able to understand the workings of HTML and CSS and be able to develop websites. I was able to show how to use Bootstrap and make my websites more dynamic and be responsive in other devices.

https://alexpr704.github.io/password/ - This link shows how I was able to create a password generator. With this random password generator it can create a password for you that will have any characters you will like. That you can even use in a big company.

https://alexpr704.github.io/weatherApp/ - This link shows how I was able to use a weather API to display any city in USA weather and utilize Jquery.

Target

My goal is to become a junior developer for your company and be able to utilize my skills to benefit your company and our consumers. Also to achieve more experience with the help of coworkers and senior developers.
